5. Details of Nominator (provided in confidence):

Please send your completed form with any photos or additional supporting evidence to Development Delivery, City Planning, The Guildhall, Alfred Gelder Street, Hull HU1 2AA.

Hull Local Heritage List Nomination Form

Guidance Notes

The following criteria for selection are adapted from the national criteria used for the statutory list:

- Architectural Interest – buildings and structures which are of importance locally for the interest of their architectural design, decoration and craftsmanship; are by locally or national important architects, engineers or designers, also particular building types and techniques (for example buildings displaying technological innovation or virtuosity) and significant plan forms
- Historic Interest – buildings and structures which illustrate important aspects of the City's history and development and/or close historical associations with locally and nationally important people or events
- Townscape Interest – buildings and structures which occupy an important place in the street (for example a corner or high point); comprise an important architectural or historic unity; or are fine examples of planning (for example squares, terraces or model villages)
- Archaeological Interest – sites and landscapes which are important locally for understanding the development of settlement and urban structure in the city and/or contribute to understanding the past lifestyles and living conditions within the city

Not all these criteria will be relevant to every case, but a particular building, other site or landscape may qualify for inclusion under one or more of them.

Buildings which are less than 30 years old will not normally be considered and will be included on the Local List only if they are of outstanding interest and quality and are under threat.

Buildings subject to an undetermined planning application or appeal will not be considered eligible as inclusion on the Local List at this stage could prejudice fair consideration of the application or appeal.

Sites and landscapes must be definable, documented and their extents mappable.
