

Notes:

- 1) Map is for use in applying the Sequential Test.
- 2) FZ 3a has been split into four sub-zones. This split is based on design flood depths for present day climate, assuming current defence levels, from the following flood sources:
 - Overtopping of defences (1% fluvial, 0.5% tidal)
 - Breaching of defences (1% fluvial, 0.5% tidal)
 - Surface water (1% event)
- 3) Flood depth bands used are:
 - FZ3a i (low): No flooding in the design event for the flood sources in note (2) above but still within FZ 3a
 - FZ3a ii (medium 1): 0.0m - 0.3m
 - FZ3a iii (medium 2): 0.3m - 0.6m
 - FZ3a iv (high): > 0.6m

Legend

- Hull City Council Area
- Waterbodies and Docks
- FZ 1
- FZ 2
- FZ 3a i (low)
- FZ 3a ii (medium 1)
- FZ 3a iii (medium 2)
- FZ 3a iv (high)
- FZ 3b (functional floodplain)
