Notes:

Based on 1% fluvial event and 0.5% tidal event.

50% fluvial flow increase used in the following models:

- River Hull & Holderness Drain (2013).
- Setting Dike (2008).
- Anlaby & Kirk Ella (Western Drain) (2013).

Default flow increase is used in the following models:

- River Hull Integrated Catchment Strategy (2015).
- Hull and Holderness Flood Alleviation Scheme (2015).
